TERM 1 SO FAR ...

We have been learning to work independently for 10 minutes at a time, changing activities up to 6 times.

Students call this learning "rotations".

The photos are of us completing different learning tasks that are included in our rotations.

We have been busy learning important routines and expectations that help us to learn together, be kind to each other and put in our bulya efforts.

Students have been focusing on using different tools throughout the day to help keep on track with learning.

The tools we have been using are for stretching, chewing, and squishing. Sometimes students use wobble stools or cushions.
